Apache Spark

Working with Data Frame Row

Dataframe = Dataset[Row]

| Timestamp	Age	Gender	Country	state
2014-08-27 11:29:31	37	Female	United States	IL
2014-08-27 11:29:37	44	M	United States	IN
2014-08-27 11:29:44	32	Male	Canada	
2014-08-27 11:29:46	31	Male	United Kingdom	
2014-08-27 11:30:22	31	Male	United States	TX

1. Manually creating Rows and Dataframe.
2. Collecting Dataframe rows to the driver.
3. Work with an individual row in Spark Transformations.

Working with Data Frame Row

```
+---+----------+                    +---+----------+
| ID| EventDate|                    | ID| EventDate|
+---+----------+                    +---+----------+
|123|04/05/2020|                    |123|2020-04-05|
